Magma Mine Company

Since 2001, Magma Mine Company, utilizing experienced and skilled personnel, as well as owning and managing several mines of Refractory clay in Iran, has been providing its services in production, processing, and supply of various types of minerals for industrial firms in the forms aggregates, lumps or granulates.

Our activities in production and trade of minerals have made us active members of Iran-Oman, Iraq, Australia, France, and China Chambers of Commerce. Through all these years, we have been cooperating with our partners and expanding our business in different countries and this has put us amongst the top mining companies in the region.

We are interested in and open to negotiations regarding the supply and trading of minerals from Iran.

Refractory Clay

Various sizes of Refractory Clay are available, which is suitable for metallurgical, glassmaking, and ceramics industries.

Code: **Magma 103B**

Geochemical Specifications (XRF Analysis)

Component	SiO ₂	Al ₂ O ₃	Fe total	FeO	Fe ₂ O ₃	MnO	TiO ₂	CaO	MgO	Na ₂ O	K ₂ O	P ₂ O ₅	SO ₃	L.O.I
Result (%)	<44.5	>36	-	-	<2	-	<2	<0.25	0.6	<0.23	<0.23	-	-	13-14
